Jolex merges into Stig Wahlström Elektronik – broadens customer offering

Tommy Ahlsved, MD, Stig Wahlström Elektronik and Mikael Klasson, MD, Jolex.

On February 1st, 2023, Jolex AB will merge into their sister company Stig Wahlström Elektronik AB. Both companies are part of the technology trading group Addtech Nordic AB. The merger means that the companies together broaden their customer offering to include more markets.

Stig Wahlström Elektronik offers high-quality products in climate control and connection technology from world-leading component suppliers, a range consisting of customized products as well as modified standard products. The company has recently undergone strong growth and is expanding its operations further when Jolex becomes part of the company on February 1st, 2023. With its unique expertise, Jolex is one of the leading companies in mainly EMC and shielding, but also in thermal products. Stig Wahlström Elektronik and Jolex have similar values and complement each other well when it comes to both products and competence.

- I look forward to continuing our growth journey together with Jolex as it is a company with completely unique experience and competence, which means that we are broadening our offering to include additional markets. The customers get the advantage of turning to one and the same company for qualitative and uniquely adapted electronics solutions, says Tommy Ahlsved, MD at Stig Wahlström Elektronik and continues:

- Our joint focus going forward will be to continue to challenge ourselves to constantly get better at what we do and to continue to develop in our areas. As many of our customers need solutions for use in extreme environmental conditions, the requirements regarding function and quality are extremely high. This is something we will certainly continue to be able to offer thanks to our broad specialist knowledge and our market-leading manufacturers.
